## The StoryTunes Mission

Our goal is to promote literacy and music appreciation in the early stages of educational development. StoryTunes encourages children to read, to sing, to think and to learn.

## StoryTunes Programs

### *Library Story Time*

StoryTunes' unique combination of children's books and music are used together to provide a creative, interactive and fun story time. Our 30 minute programs fit perfectly into the weekly or monthly time slots that most libraries schedule regularly for story time.

We have been successful in a variety of libraries because at its heart, StoryTunes is really about making literature and music accessible to children and enjoyable for families.

### *Classroom Programs*

In the classroom setting, StoryTunes is much more than just entertainment. Because of its foundation in literature and music, StoryTunes is an effective educational supplement.

Our classroom programs utilize age and theme appropriate books and stories and can be tailored to fit with your lesson plans and enhance the learning experience.
